

Help *Keep The Lights On*

Indianapolis Power & Light Company (IPL) has undertaken a community awareness initiative called “Keep the Lights On” to identify street lights with problems, and get those problems corrected.

IPL counts on assistance from the public to let them know where there’s a light that:

- Is not lighting at night
- Is burning during daylight hours
- Has equipment defects, like a lens that’s loose and hanging, or a plate that’s come off the light pole.

There are two convenient, simple ways to report a street light with problems:

- Call IPL’s “Lights Out Day or Night” number, 261-8111, and let them know the location of the light ...

- or -

- Visit IPLpower.com for an online form where you can report a street light problem.
